

How to Perform Wudhu

	<p style="text-align: center;">RECOMMENDED Washing hands 2 times</p>
	<p style="text-align: center;">RECOMMENDED Gargling water in mouth 3 times</p>
	<p style="text-align: center;">RECOMMENDED Water into nostrils 3 times</p>
	<p style="text-align: center;">OBLIGATORY Splash water onto face and wipe in a downwards motion, covering the area from the hairline to the bottom of the chin.</p>
	<p style="text-align: center;">OBLIGATORY Drop water onto your right arm With your left hand wipe the water over your right arm, ensuring that the water reaches all areas between the elbow and the fingertips Always wipe in a downwards motion moving away from the elbow</p>
	<p style="text-align: center;">OBLIGATORY Drop water onto your left arm (now turn off the tap) With your right hand wipe the water over your left arm, ensuring that the water reaches all areas between the elbow and the fingertips Always wipe in a downwards motion moving away from the elbow</p>
<p>From this point onwards you cannot use any fresh water from the tap. Masah (wiping) must be performed using existing water that has been involved in your wudhu.</p>	<p>This is why, in the instruction above, it is important to turn off the tap before wiping the left arm. Otherwise, if you turn off the tap after wiping the left arm you run the risk of picking up fresh water.</p>
	<p style="text-align: center;">OBLIGATORY With your right hand, masah (wipe) the hair from the middle of the top of the head down to the hairline</p>
	<p style="text-align: center;">OBLIGATORY With your right hand wipe your right foot in one motion between the toes and the ankle (either direction is acceptable). Make sure that your hand moves and your foot remains still. Again, you should not be using and fresh tap water, just the moisture that remains on your hand from previous wudhu actions.</p>
	<p style="text-align: center;">OBLIGATORY With your left hand wipe your left foot as described for the right foot.</p>
